

Product-Focused UX Specialist

I work on tools that bridge **Money**, **People**, and **Game Development**

Domain: Enterprise internal tools

Strength: turning ambiguity into decisions

**Case Study: RPM UI Revamp & Design
System**

Who I am

I'm Favour Diokpo, a Senior UX Specialist working on internal platforms that help studios plan work, request hires, and make approvals. My day-to-day is turning messy workflows into something people can actually use without babysitting the system.

I'm pivoting into Product Ownership because I already operate at the decision layer: I clarify rules, align stakeholders, and push work toward shippable outcomes—not just prettier UI.

● MY EDGE

I turn governance problems into shippable options with proof.

When teams disagree, it's usually because the rules are unclear, the data isn't trusted, or the process hides what matters. I surface the real decision, define what must be true, and help teams ship the smallest change that improves outcomes.

From UX Craft to Product Leadership

These are the same skills, just applied to bigger decisions.

- Discovery → Direction

- **UX:** interviews, workflow analysis, pain-point mapping
- **Product:** clear problem framing + success criteria

- IA → System clarity

- **UX:** information architecture, interaction models
- **Product:** rules/definitions people can trust

- Prototypes → Options

- **UX:** prototypes + validation
- **Product:** 2–3 feasible options with trade-offs

- Testing → Risk reduction

- **UX:** usability + comprehension checks
- **Product:** de-risk adoption (trust, performance, fatigue)

- Workshops → Alignment

- **UX:** facilitation and synthesis
- **Product:** decision logs + scope clarity + buy-in

- UX metrics → KPIs

- **UX:** task success, errors, time-on-task
- **Product:** cycle time, back-and-forth, operational load

Let's Build Together

Shipping measurable outcomes
through user-centered product
strategy
